CAPACITY STATEMENT Vr. 1.3/2025

Company Data

Biolabs Red Services Ltd, together with its training arm Ethan Quality Management Institute, is a Ugandan-based multinational consultancy firm with collaborations in East Africa, Malawi, and South Africa. The company is legally registered to conduct business with international governments and was formally recognized by the Ministry of Health, Uganda (ADM:171/388/01) to provide Quality Assurance consulting and technical support services for medical laboratories. Its work is directly supervised by the Uganda National Health Laboratory Services/Central Public Health Laboratories (UNHLS/CPHL), ensuring alignment with national priorities.

With over 10 years of experience, Biolabs has established itself as a trusted partner in health systems strengthening, laboratory quality management, diagnostic stewardship, and antimicrobial resistance (AMR) surveillance. The firm has developed a reputation for driving accreditation readiness, quality improvement, mentorship, and implementation support, leveraging internationally recognized standards such as ISO 15189, ISO 17025, ISO 17043, ISO 17011, ISO 19011, ISO 35001, ISO 22367 and ISO 9001.

One of our core areas is to strengthen antimicrobial stewardship (AMS) across Sub-Saharan Africa by building sustainable, laboratory-driven stewardship models that optimize antimicrobial use, enhance AMR surveillance, and integrate quality improvement practices into healthcare facilities. By integrating diagnostic stewardship with clinical AMS, Biolabs ensures that laboratory data directly informs rational prescribing, strengthens surveillance systems, and contributes to global AMR mitigation efforts.

Past Achievements & Experience

Biolabs Red Services has over a decade of experience strengthening laboratory systems, implementing AMR/AMS interventions, and supporting accreditation in Uganda and the wider region. Our achievements span training, accreditation, mentorship, stewardship interventions, audits, research, and partnerships.

1. Training & Capacity Building

- Conducted 41 ISO-based management system trainings (ISO 15189, 17025, 35001, 9001) for hospitals, universities, and implementing partners (IDI, Baylor Uganda, UVRI, Lubaga Hospital, Case Hospital, RHITES, TASO, EGPAF, MUWRP, Rakai Health Sciences Project, Muni University, Mildmay Uganda, URC).
- Training content covered: biorisk management, ISO management systems, management review, risk management, corrective & preventive action, auditing principles, and statistical process control.
- Developed and revised complete sets of training materials traceable to ISO TC 212 standards.
- Built national capacity through Train-the-Trainer programs, strengthening sustainability,

2. Laboratory Accreditation Support

- Supported 28 hospital laboratories to achieve ISO 15189 accreditation, including Central Emergency Response and Surveillance Lab, Uganda Cancer Institute, Kiruddu National Referral, Kawempe National Referral, Hoima Regional Referral, Arua Regional Referral, Soroti Regional Referral, Gulu Regional Referral Hospital, and Bombo Military General Hospital lab, Lira Regional Referral Hospital.
- Provided end-to-end accreditation support: work plan development, stakeholder engagement, baseline audits, capacity building, infrastructure assessment, mock audits, and coordination with accreditation bodies.
- Currently providing technical assistance to:
 - UVRI (to achieve ISO 17043:2023 accreditation for EQA schemes).
 - National Equipment Calibration Laboratory (NECL) (to retain ISO 17025:2017 accreditation).

3. Mentorship & Continuous Quality Improvement

- Delivered 264 structured mentorships under the 8-4-3 Uganda Premier Accreditation Model, enabling progressive improvements across supported hospitals.
- Supported Koboko and Adjumani Hospitals to advance from 2 Stars to 4 Stars under the ASLM audit framework.
- Facilitated Arua Regional Referral Hospital Laboratory to improve from 0 to 4 Stars during peer assessments.
- Designed tailored mentorship cycles addressing systemic deficiencies identified during audits and risk assessments.

4. AMR/AMS & Diagnostic Stewardship Interventions

Biolabs has pioneered interventions linking laboratories to stewardship programs across Uganda:

- Clinician–Laboratory Interface Meetings: Established regular meetings to strengthen communication between prescribers, pharmacists, and laboratory staff for evidence-based prescribing.
- Hospital AMS Committees: Supported formation and functionality of AMS committees across multiple regional and general hospitals.
- Medicine & Therapeutics Committees (MTCs): Provided technical guidance for formulary reviews and integration of stewardship into MTC activities.
- Point Prevalence Surveys (PPS): Conducted PPS to track antibiotic use patterns and benchmark rational use indicators.
- Prescription & Post-Prescription Audits: Implemented audit-and-feedback systems to optimize empirical and post-laboratory prescribing.
- Data Quality Audits (DQAs): Conducted structured DQAs for AMR/AMS reporting to ensure data accuracy and completeness.
- Surveillance Strengthening: Enhanced active and passive AMR surveillance using WHONET and ALIS platforms for national reporting.
- Diagnostic Stewardship: Introduced models to link microbiology results with prescribing practices, including specimen management improvements and clinician feedback.
- AMS Training & Mentorship: Trained and mentored clinicians, pharmacists, and laboratory staff on rational prescribing, antibiogram development/use, and integration of AMS into hospital systems.
- Guideline Development: Supported MOH and partners in drafting stewardship frameworks, SOPs, and monitoring tools for antimicrobial use and resistance.

5. Audits & Quality Systems Strengthening

- Conducted 84 ISO-based QMS audits in 15189-implementing laboratories using ISO 19011 standards.
- Participated in national biosafety and biosecurity audits (2020) and contributed to the development of the National Biosafety & Biosecurity Report (2020).
- Conducted SLIPTA audits in 8 laboratories as part of SLMTA implementation.

6. Policy & Strategic Framework Development

- Supported development of the UGAS policy manual in line with ISO 17011.
- Contributed to Uganda's QMS sustainability plan under the CDC-funded SPHLS project.
- Led development of the National Mentorship Guide for ISO 17025, enabling One Health quality system improvements in non-medical labs.
- Supported the National Biosafety & Biosecurity Strategic and Costed Plan.
- Developed a QMS implementation framework for WHO Sudan, successfully adopted regionally.

7. EQA & Interlaboratory Comparison

- Designed and implemented customized interlaboratory comparison schemes such as for Ebola, Marbug, yellow fever, Rift valley fever (aligned to ISO 13528:2022, ISO 17043, SANAS R80) where formal EQA was unavailable
- Enabled 5 accredited labs to achieve accreditation scopes without EQA through interlaboratory comparison models.
- Collaborated with ISO 17043-accredited providers (HUQAS, AFREQAS) to align client laboratories with international EQA requirements.

8. Research & Innovation

- Coordinated and participated in public health and biomedical research projects, including AMR surveillance, infection prevention, and stewardship-related implementation research.
- Engaged in data-driven studies using WHONET/ALIS for national AMR surveillance reporting and evidence generation.
- Supported research translation into policy and practice through hospital-based stewardship pilots.

9. Partnerships & Global Recognition

- Partnered with QualExpect Consulting (South Africa) and Morehouse Instrument Company (USA) to expand calibration and metrology services in Uganda.
- Partnered with PECB (global certification body present in 150+ countries) to deliver internationally recognized training and certification.
- Prequalified by the Global Fund (2017) as a Technical Assistance Provider for laboratory systems strengthening across West & Central Africa.

10. Equipment & Clinical Quality Services

- Supplied, installed, and maintained equipment in partnership with manufacturers in Denmark, Sweden, and China.
- Supported verification experiments and equipment management systems based on international standards.
- Delivered Good Clinical Practice (ICH-GCP E6 R2a) and Good Clinical Laboratory Practice (GCLP) training and audits, preparing entities for inspection and certification.

Key Partnerships:

Biolabs Red Services Ltd has established a strong track record of collaboration with leading global and national stakeholders, demonstrating our credibility and reach in AMR/AMS implementation. Our partnerships include:

- **World Health Organization (WHO)** – supported regional frameworks on laboratory quality and biosafety, Centre of Excellence for Pandemic preparedness
- **Centers for Disease Control and Prevention (CDC)** – contributed to QMS sustainability and AMR surveillance strengthening.
- **USAID (IDDS Project) & PATH** – supported diagnostic stewardship and data systems for AMR.

Biolabs Red Services

Quality Management Systems

- **Global Fund** – prequalified as a technical assistance provider for laboratory and AMR capacity building in West and Central Africa.
- **Baylor Uganda, Infectious Diseases Institute (IDI), Joint Clinical Research Centre (JCRC), TASO, EGPAF, Rakai Health Sciences Project** – partners in training, mentorship, and AMS interventions.
- **Uganda Ministry of Health & Uganda National Health Laboratory Services (UNHLS/CPHL)** – recognized to provide quality assurance and technical support services, directly aligned with national AMR and laboratory strengthening priorities.
- **National Drug Authority (NDA)** – collaborations on regulatory strengthening and stewardship alignment.

Through these collaborations, Biolabs has consistently delivered sustainable outcomes in accreditation, antimicrobial stewardship, and AMR surveillance.

Competitive Advantage

Biolabs Red Services Ltd offers unique strengths that differentiate us as a leader in AMR/AMS program implementation:

- **Proven Mentorship Model:** Our *8-4-3 mentorship model* accelerates accreditation readiness and has been successfully adapted to support AMS interventions, ensuring rapid and sustainable outcomes.
- **Integration of Diagnostic and Clinical Stewardship:** We bridge laboratory data with clinical decision-making through clinician–lab interface meetings, prescription audits, and antibiogram use, ensuring stewardship programs are evidence-based and actionable.
- **ISO-Certified Experts:** Our team includes ISO lead auditors, microbiologists, clinical pharmacists, and stewardship specialists with deep expertise in QMS, AMR surveillance, and AMS program design.
- **Scalable and Sustainable:** Our approaches are designed to integrate within national action plans and global AMR frameworks, ensuring sustainability beyond project cycles.
- **Demonstrated Impact:** We have delivered tangible improvements in laboratory accreditation, prescribing practices, point prevalence surveys (PPS), antimicrobial use monitoring, and AMR data quality.

Alignment with AMS Priorities

Biolabs Red Services Ltd is uniquely positioned to contribute directly to the priorities of the Pfizer/ISID AMS Grant. Our experience aligns with and supports the following areas:

- **Strengthening AMS in healthcare facilities** through multidisciplinary AMS committees, MTC integration, PPS, and prescription audit-feedback loops.
- **Reinforcing health systems and regulatory capacity** via development of stewardship frameworks, SOPs, and national policy guidance.
- **Improving access and promoting rational use of antibiotics** by linking microbiology data to prescribing practices and supporting hospital formulary reviews.
- **Enhancing AMR surveillance and data systems** through technical support for WHONET/ALIS, data quality audits, and integration into national reporting structures.
- **Advancing diagnostic technologies to support stewardship** by optimizing specimen management, diagnostic networks, and culture/sensitivity testing for stewardship.

MANAGEMENT CAPACITY

Financial Management

Biolabs Red Services has established a strong and accountable financial management system guided by approved policies, standard operating procedures, and supporting forms. The system leverages electronic platforms such as QuickBooks for records management and Beyonic-OnAfriq for petty cash administration. Anchored on Good Accounting Principles (GAAP) and International Accounting Standards (IAS), the system is fully aligned with PEPFAR compliance requirements. To date, Biolabs manages resources amounting to **USD 918,123.85** and has consistently achieved tax clearance for the past decade. The company's finances are externally audited on an annual basis by Woodhask (ICPAU Firm No. AF0357), ensuring transparency, accountability, and credibility.

Human Resource Management

Under the stewardship of the Human Resource Director, Biolabs Red Services has developed and implemented a comprehensive Human Resource Manual, currently maintained at version control level. The manual covers all aspects of staff welfare including benefits under the National Social Security Fund (NSSF), occupational health and safety provisions, sexual harassment prevention policies, and structured performance management systems. Staff work under a timesheet model powered by Microsoft Office TimeClock 365, enabling efficient tracking of productivity, accountability, and equitable compensation.

Procurement Management

Biolabs Red Services operates a robust procurement management system under the oversight of the Operations Director. The system is designed to guarantee value for money, compliance with the Office of Foreign Assets Control (OFAC) guidelines, and ethical sourcing practices. The company maintains an updated list of prequalified vendors across all its service categories, ensuring efficiency, transparency, and consistency in procurement.

Fleet Management

The company has invested in efficient fleet management systems to optimize resource utilization. Vehicles are equipped with modern car-tracking technology and fuel card systems, enabling real-time monitoring of movement and expenditure. This approach ensures accountability, reduces operational costs, and supports reliable service delivery across Biolabs' projects and partnerships.
